

# Hamlet and Kepler

Adam Atkinson  
Annual MathsJam Gathering  
2020

Lots of disclaimers here

# What is Hamlet?

- Mornington Crescent
- The Four Yorkshiremen Sketch

(If you've heard of Hamlet before, when and where?)

# Some possible moves

- I don't understand higher category theory.
- Until two years ago I only knew one actual example of a singular distribution.
- I don't understand what a normal subgroup is.
- I've never done any probability at all.
- I didn't know mixed numbers existed until I was 30.
- Until 2018 I didn't know ":" was used for division in some countries.
- Until last year I thought 0 was neither even nor odd.

My new candidate move?
